# BLEACHER JERSEYS

Turn your bare bleachers into a creative branding asset with bleacher graphics. Many high schools and colleges have found that branding their stadiums and bleachers turns that ugly under side of the stands into an eye-popping canvas! Bleacher Graphics are made from CGS CFlex, a super-durable, poly scrim material that allows 25% wind pass-through, making this material the most durable and wind resistant available. This system makes your graphics look impeccable!

Our CGS CFlex Mesh is lightweight, durable, and weather resistant. It is great for athletic events, races, crowd control, and security purposes. CFlex Mesh is easily set up by fastening a cable tie through the mesh and around any stationary pole or object.
